

ACTUATORS & DAMPERS

WHISKER SWITCH KLNJ-A2

DESCRIPTION

The KLNJ-A2 whisker switch is a high-quality, multi-directional contact switch with a plastic coated spring-rod whisker. It is perfect for sensing damper blade position and can be used to provide position status of valve linkages or other mechanical devices.

FEATURES

- Plastic coated spring-rod whisker for long life
- Captive wiring cover screws to save time
- Heavy duty 10A @ 120 VAC contacts

KLNJ-A2
