WATTSTOPPER LIGHTING INTEGRATOR PANELS WITH DIGITAL LIGHTING MANAGEMENT DLM SUPPORT

LMCP SERIES

DESCRIPTION

The **Wattstopper LMCP Series** panel provides simple BACnet (MS/TP) network-capable lighting control enabling the automation of lighting functions throughout an entire facility. The HDR relays in the panel can respond directly to low voltage inputs from Digital Lighting Management (DLM) switches, occupancy sensors, daylight sensors, and input modules.

FEATURES

- **Single pole heavy duty lighting/plug relays**
- **Available in interiors sized for 8, 24, or 48 relays**
- **LMCT-100 handheld Configuration tool for setup**
- **Runs event-based schedule routines independently**
- **Supports astronomical, time-based event types**
- **Two free topology DLM Category 5e local networks**
- **Supports DLM sensors, switches, and LMIO input modules**
- **Auxiliary power available, 15VDC or 24VDC**
- **Qualifies for use in ARRA-funded projects**
