

POWER MONITORING & PROTECTION

ADVANCED SURGE PROTECTION FAS-TEL

DESCRIPTION

The **EDCO FAS-TEL** is an advanced two-stage hybrid, solid-state phone and data line surge protector. It is designed to protect electronic equipment from unwanted surges and transients that may be present on the phone line or communications data lines. The FAS-TEL is UL Listed.

FAS-TEL

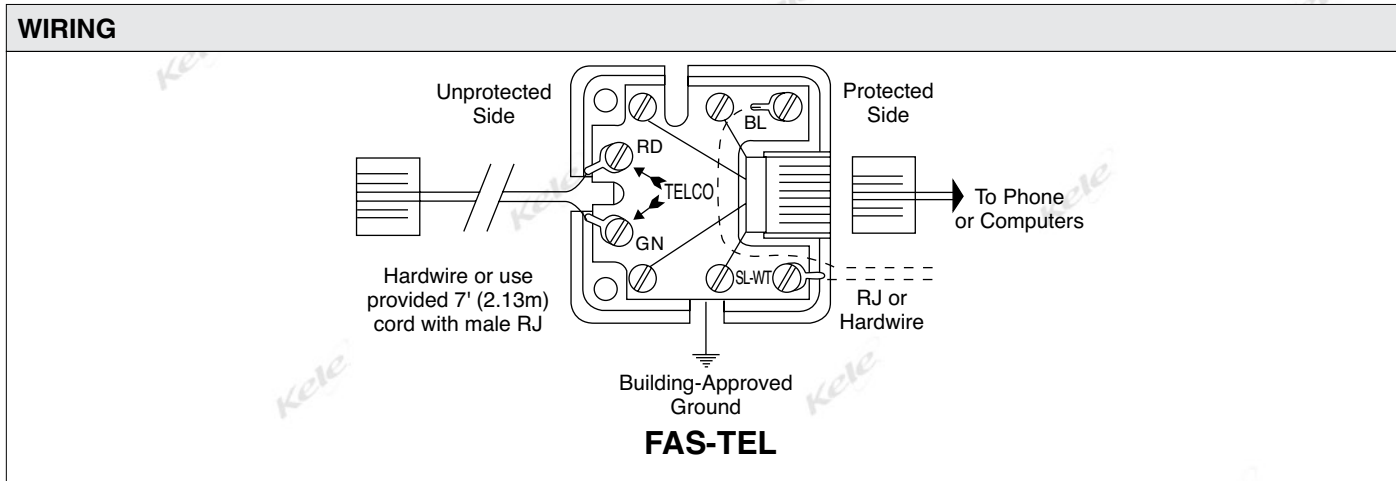

FEATURES

- **Fast response time** (<1 ns)
- **Sneak fault current detection**
- **Over-current protection**
- **Line-to-line and line-to-ground protection**

SPECIFICATIONS			
Signal Voltage	220V Peak	Connections	1 female, 1 male RJ11 jacks
Continuous Current	Unlimited	Operating Temperature	-40° to 185°F (-40° to 85°C)
Nominal Breakdown Voltage	270V	Operating Current	0.15A
Protection	Between TIP/RING/GND	Dimensions	2.0" H x 2.0" W x 1.0" D (5.1 x 5.1 x 2.5 cm)
Capacitance	50 pF	Weight	0.1 lb (0.05 Kg)
Series Resistance	8Ω	Approvals	UL 1449 listed, File #E118759
Surge Current	Maximum 100A, 10 x 1000 μs	Warranty	1 year
Response Time	<1 ns
