

## AIR PRODUCTS AND CONTROLS ENCLOSED 24 VAC POWER SOURCE T-PB SERIES

### DESCRIPTION

The **Air Products and Controls T-PB Series** power source provides 24 VAC from a 115 VAC input. Each **T-PB Series** unit contains an LED that illuminates when the 24 VAC output is operational. An on/off switch is provided in the 115 VAC input. This switch disconnects or connects both the hot and neutral of the input power. A convenience outlet is located on the front panel. This convenience outlet is not controlled by the on/off switch and is always hot. A circuit breaker is incorporated in the 24 VAC circuit, which must be manually reset if the rated 3.0A (Class 2) or 4.0A (Class 1) is exceeded and the breaker operates. The **T-PB Series** is available in a metal enclosure (UL Listed) for field applications or without the enclosure (UL Recognized) for panel mounting.

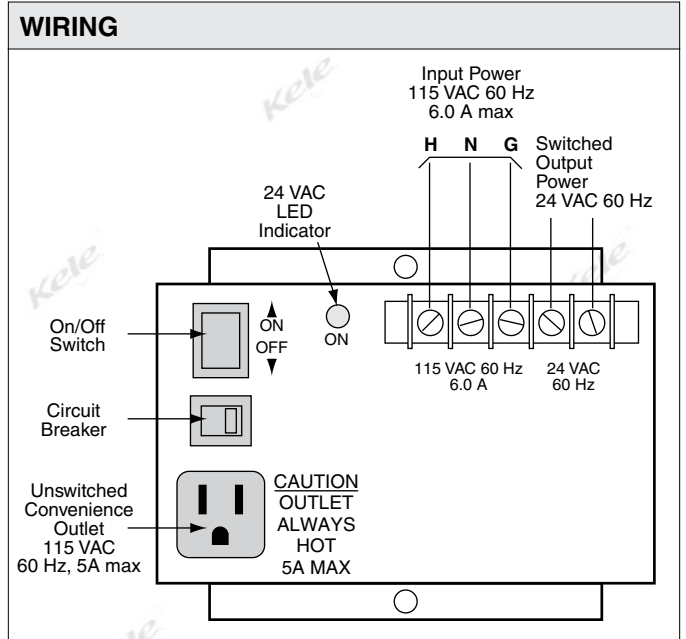

### FEATURES

- Enclosed and panel-mounted models
- On/Off switch
- Convenience outlet, non-switched
- Circuit breaker
- Enclosure with removable access panel to on/off switch, breaker, and outlet

T-PB202-1

SPECIFICATIONS	
Supply Voltage	115 VAC, 60Hz
Output Voltage	24 VAC
Supply Current	6 A maximum
Convenience Outlet	115 VAC, 5 A
Indication	Green LED, 24 VAC, Power-Available
Controls	24 VAC Output, On/Off Switch
Output Current/VA Rating	
T-PB202	4.0 A, 96 VA (Class 1)
T-PB303	3.0 A, 72 VA (Class 2)
Current Protection	4 A Circuit breaker (Resettable)
Operating Temperature	-13° to 140°F (-25° to 60°C)
Mounting	Panel mount, Enclosed
Enclosure Rating	NEMA1, with Outlet-Controls Cover
Dimensions	
Panel mount	4.75"H x 5.0"W x 3.75"D (12.1 x 12.7 x 9.5 cm)
Enclosed	6.12"H x 5.19"W x 4.12"D (15.5 x 13.2 x 10.5 cm)
Weight	5.5 lb (2.65 Kg)
Approvals	UL File #E160579
Warranty	1 year
