

## More To Your Bottom Line

**MAGNEPULL** makes most any installation or wiring project a one-man job. The unique drop magnet design holds secure and cuts through insulation.

**Your Installers Get More Work Done in a Day!**

## Additional MAGNEPULL Products & Accessories

### MAGNESPOT

The **MAGNESPOT** Reference Point Locator is used to locate the Reference Marker through structures such as drywall or flooring (Approx. 3" range).

3/4" Drop Magnet with Eye Fitting (XP1000-3-1)

3/4" Drop Magnet with Leader (XP1000-3)

1/2" Drop Magnet with Leader (XP1000-6)

1 1/8" Metal Stud Drop Magnet with Leader (XP1000-8)

3/4" Drop Magnet 8/32" Thread (XP1000-4)

Magnespot Reference Marker (MS800-1)

Warning:  
The strong magnetic fields of MAGNEPULL can harm electronics.

## XP1000 Series

**Drop**

**Drag**

**Drill**

## More Power

**MAGNEPULL** is the most advanced cable retrieval system on the market today. Using powerful rare earth magnets, **MAGNEPULL** works through drywall, insulation and carpet.

Its patented design makes any wiring or cable installation job an easy, one-man task and **MAGNEPULL REDUCES CABLE & WIRE INSTALLATION TIME BY 70%!**

**MAGNEPULL** is designed for commercial or residential installations of cable, satellite TV, home theater, security and telecom wiring eliminating the problems associated with wire fishing.

- **MAGNEPULL's** powerful magnets give you the confidence of knowing where your wire is inside the wall so you drill only the hole you need.
- **MAGNEPULL's** smooth rolling design prevents wall damage.
- **MAGNEPULL** is easy to use in tight spaces.
- **MAGNEPULL** reduces time in hot attics.

Each **MAGNEPULL** kit comes with:

- Retrieval Unit
- Drop Magnet
- Jack Chain
- Convenient Carrying Case
- **MAGNESPOT** (optional)

## A MAGNEPULL Installation is as Easy as ...

### Drop

The installer inserts the Drop Magnet into the wall cavity.

### Drag

The installer quickly locates the drop magnet through the drywall with the **MAGNEPULL** Retrieval Unit, and drags the wire to the desired location.

### Drill

Using the **MAGNEPULL** Retrieval Unit to hold the wire in place, the installer easily drills one hole and pulls the Drop Magnet and wire through the hole to finish the job.
