

MS800

## HOW IT WORKS

**REDUCES  
INSTALLATION  
TIME**

The **MAGNESPOT** reference point locator is used to locate a Reference Marker through structure such as sheetrock or flooring .

- Locates Reference Marker up to a distance to 3 inches or more.
- Reduces time in the attic.
- Helps eliminates wall damage due to misplaced holes.
- Works well for speaker placement.
- Reduces trips to the attic.
- Can be used with reusable adhesive to eliminate Reference Marker pin
