## B225HT1856, 1", High Temperature CCV Stainless Steel Ball and Stem

| Technical Data                        |   |
|---------------------------------------|---|
| Service                               | high temperature hot water/low pressure       |
|                                       | steam, up to 60% glycol                       |
| Flow Characteristic                   | A-port equal percentage                       |
| Controllable Flow Range               | 75°   |
| Size [mm]                             | 1" [25]                                       |
| End Fitting                           | NPT female ends                               |
| Body                                  | nickel plated brass (DZR) P-CuZn35Pb2         |
| Ball                                  | stainless steel                               |
| Stem                                  | stainless steel                               |
| Stem Packing                          | Vition O-ring                                 |
| Seat                                  | ETFE  |
| Seat O-ring                           | EPDM (lubricated)                             |
| Characterized Disc                    | ETFE  |
| Body Pressure Rating [psi]            | 600   |
| Max Inlet Pressure (Steam)            | 15 psi  |
| Media Temperature Range<br>(Water)    | 60°F to 266°F [16°C to 130°C]                 |
| Media Temperature Range (Steam)       | 250°F [120°C]                                 |
| Maximum Differential Pressure (Steam) | 15 psi  |
| Max Differential Pressure (Water)     | 60 psi partially open ball, 116 psi full open |
| Close-Off Pressure                    | 200 psi                                       |
| Cv                                    | 18.56   |
| Weight                                | 1.8 lb [0.8 kg]                               |
| Leakage                               | 0%  |
| Servicing                             | maintenance free                              |
|                                       |   |

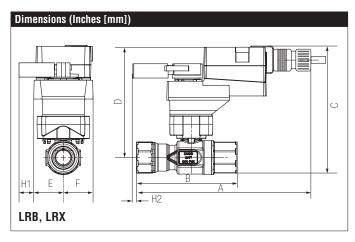

## **Application**

This valve is typically used in air handling units on heating or cooling coils, and fan coil unit heating or cooling coils. Some other common applications include unit ventilators, VAV box re-heat coils and bypass loops. This valve is suitable for use in a hydronic system with variable flow.

This valve is designed to fit in compact areas where on/off, floating point and modulating control is required using 24 VAC.

## **Suitable Actuators**

|            | Non-Spring | Spring |  |  |  |
