## TERMS AND CONDITIONS OF SALE

### ORDER ENTRY

Purchase orders to Dynacon may be entered by any of the following methods:

#### By Mail:

Dynacon Inc.  
P.O. Box 205  
Weyers Cave, VA 24486

#### By Telephone:

(540) 234-9000  
8:30 am to 5:00 pm ET  
Monday through Friday

#### By Fax:

(540) 234-9061  
24 hours per day  
7 days per week

#### By Internet:

[www.dynacononline.com](http://www.dynacononline.com)

ACCEPTANCE OF ALL ORDERS IS SUBJECT TO CREDIT APPROVAL BY DYNACON.  
MINIMUM BILLING PER ORDER IS \$25.00

### GENERAL PRICING POLICY

**ALL PRICES ARE F.O.B. SHIPPING POINT.** Unless otherwise specified, shipments will be by U.P.S. Freight plus a \$2.00 handling fee and U.P.S insurance fee of \$0.40 per \$100 value will be added to each shipment. Large actuators and valves which exceed U.P.S. weight limits, or are crated for shipment, will be shipped *freight collect* using the least expensive truck line.

**PRICES BASED ON QUANTITY-PER-ORDER.** Prices for Dynacon equipment are determined by the quantities of each product purchased for shipment at one time. Different part numbers *cannot* be combined for quantity pricing.

**PRICES SUBJECT TO CHANGE WITHOUT NOTICE.** Material ordered for immediate shipment prior to the effective date of the price change will be billed at the lower price.

### PAYMENT TERMS

Invoices for material purchased from Dynacon are payable *NET 30 DAYS* from the date of the invoice. All payments are to be made in U.S. dollars to Dynacon Inc., P.O. Box 205, Weyers Cave, VA 24486. Material shipped on a C.O.D. basis will include a \$10.00 handling charge to be paid upon receipt.

### CREDIT BALANCES

If account credit balances are not applied or requested within one year of issuance, any remaining balances will be subject to cancellation, and Dynacon will have no further obligation.

### WARRANTY POLICY

Dynacon products are sold with such warranties as may be extended by the product manufacturer (normally twelve months from date of purchase). Dynacon makes no other warranty claims and *THERE ARE NO IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS*. In no event is Dynacon responsible for consequential damages. The Buyer is responsible for installation and use of the products in accordance with the manufacturer's instructions.

### RETURNED MATERIAL POLICY

Material being returned to Dynacon for any reason must receive prior authorization from Dynacon and be assigned a Return Authorization Number which is to be shown on the packing slip accompanying the return. Returns are to be shipped freight prepaid to the address designated by Dynacon. If the equipment is defective and in warranty, Dynacon will prepay normal U.P.S. charges for replacement. Non-defective material returned for credit must be received freight prepaid in new and resalable condition. Products manufactured by KMC Controls must have been shipped within the most recent 6 months and are subject to a 25% restocking charge (a 50% restocking charge applies for all KMC valves). For all other Dynacon products, a credit less a 15% restocking charge will be issued. All returned material that does not have a properly assigned Return Authorization Number or does not comply with this policy will be returned to the sender.

### RIGHT OF SUBSTITUTION

Dynacon reserves the right to substitute products of equivalent specifications provided the operational characteristics of the products are not effected.

# Web-Based Controller

## Maverick

IP Sensor Appliance  
from MAMAC Systems

### Web-Based Controller with

- ◆ a web server
- ◆ analog/digital inputs
- ◆ relay outputs

ANYONE WHO CAN SURF THE WEB NOW CAN DO SENSOR MONITORING, LOAD CONTROL, DATA LOGGING AND EMAIL ALERTS WITHOUT ANY TRAINING OR CUSTOM SOFTWARE.

ALL YOU NEED IS A WEB BROWSER RUNNING ON ANY LAPTOP, PDA, OR CELL PHONE ANYWHERE IN THE WORLD.

POWER THE MAVERICK WITH ANY 24 VAC TRANSFORMER, PLUG IT INTO A HUB/ROUTER, LAUNCH ANY WEB BROWSER, PUNCH IN THE DEFAULT IP AND CONNECT. YOU ARE NOW READY TO USE THE INTUITIVE AND FAMILIAR NAVIGATION OF YOUR BROWSER TO CONFIGURE AND UTILIZE THE APPLIANCE.

#### INPUTS & OUTPUTS

- ✿ Two I/O versions: 4 analog or digital inputs and 4 relay outputs; or, 8 analog or digital inputs and no outputs
- ✿ On Voltage input models, the appliance can be field configured for 0-5 or 0-10 VDC inputs
- ✿ On versions with relay outputs, any input can be assigned to control relays 1 through 4
- ✿ An output can be controlled by an input and/or by time based control
- ✿ Analog inputs may be temperature, pressure, or humidity transmitters, or other instruments with 0-5/0-10 VDC or 4-20 mA outputs
- ✿ Digital inputs could include relay or controller contacts monitoring pumps, fans, etc.

#### BROWSER INITIATED MANUAL CONTROL

- ✿ Any output can be controlled remotely with a web browser running on a laptop, cell phone or PDA
- ✿ If an email alert is received, the user can remotely control the output manually until the situation is corrected on-site

#### EMAIL ALERTS

- ✿ Provides a user friendly email alert capability
- ✿ Alerts can be sent to up to two email addresses
- ✿ Email alerts can be configured on all inputs
- ✿ A comma separated log file can be attached to the email alert, allowing the user to not only receive an alert but also to parse the log file and know why the alert was sent
- ✿ Alerts can be set to initiate on a power outage and log the times when power was lost and restored, including a time stamp of events

#### DATA LOGGING

- ✿ Up to 2048 samples can be logged for each input
- ✿ The logging interval can be configured to be from 1 second to 99.99 hours
- ✿ Data is logged in a standard CSV file and can be reviewed with Notepad, Wordpad, Excel or other software which opens comma separated files
- ✿ The *Maverick* also uses a JavaScript which runs on the web browser to display the logged data as a graph

## IP Sensor Appliance from MAMAC Systems

*Ideal low cost solution for light commercial, residential and remote monitoring applications. Can also be used to enhance existing HVAC control systems by adding email alerts and data logging to critical points.*

**Supply Voltage:** 24 VAC/VDC

**Supply Current:** 250 mA (6 VA)

**Input Impedance:**

VDC or Digital Input: 125K ohms

4-20 mA Input: 250 ohms

Digital Input: 10 VDC maximum

Output Relay Rating: 5 A @ 250 VAC, UL

Ethernet: 10-Base T

IP Assignment: Static or DHCP

Data Logging: 2048 samples per input

Logging Interval: 1.0 second to 99.99 hours

**Email:** SMTP to two email addresses

**Environment:** 10-90% RH, non-condensing

**Operating Ambient:** -40°F to 125°F (-40°C to 52°C)

**Storage Ambient:** -40°F to 150°F (-40°C to 66°C)

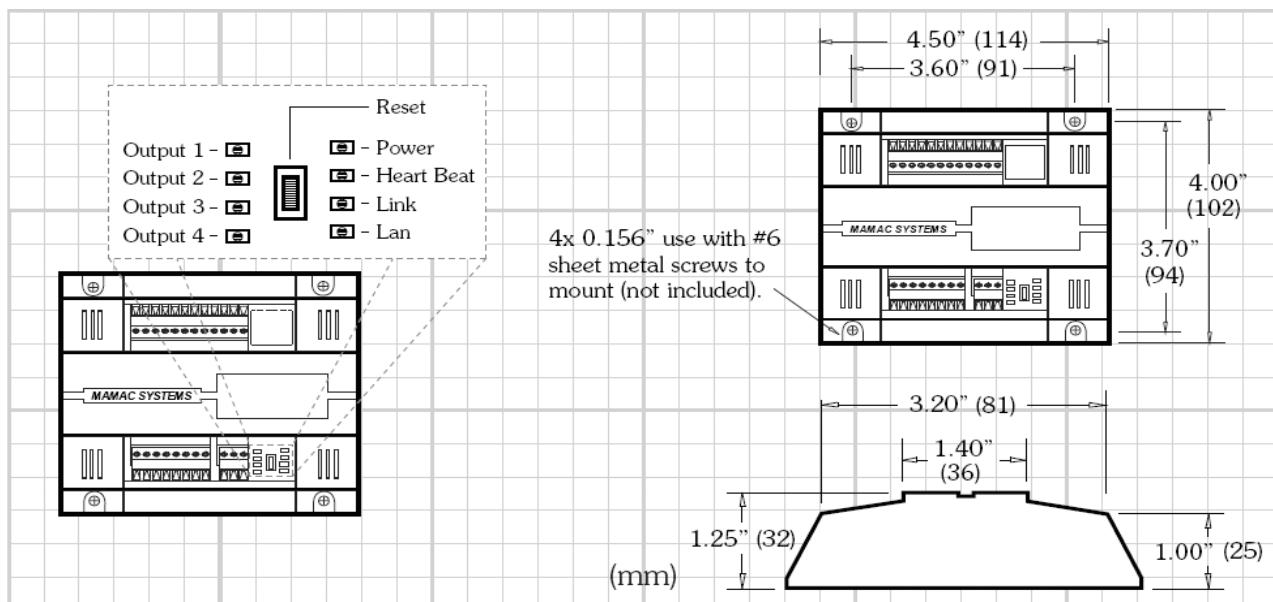

**Enclosure:** UL94V-5-O polycarbonate plastic

**Terminations:** removable terminal blocks, 16 Ga. maximum; RJ-45 Ethernet jack

**Weight:** 0.5 lbs (0.25 kg)

**Compliance:** RoHS

**Conformance:** FCC Part 15, Subpart B;  
EMC/EMI Testing

# ELECTRONIC CSP-5001 Series

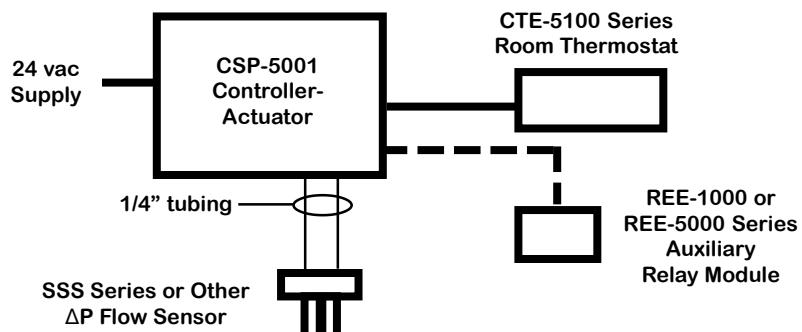

## VAV TERMINAL UNIT CONTROL SYSTEM

### System Configurations

### Pressure Independent

#### BASIC CONTROL LOGIC

1. In response to space temperature, the room thermostat sends a 0 to 10 vdc "desired air flow" signal to the CSP-5001 controller-actuator.
2. The controller-actuator compares this "desired air flow" signal to "actual air flow" as derived electronically from its onboard flow-through sensor which is connected to the SSS duct sensor or other  $\Delta P$  pick-up.
3. The controller-actuator drives the VAV damper box open or closed as required to match airflow requirements.

For individual model specifications, see following pages in this section.

- Airflow sensed by using single or multi-point differential (velocity) pressure airflow sensor.
- CSP-5001 onboard flow-through sensor electronically measures air velocity in the duct.
- Airflow velocity flow limits set at either the thermostat or at the CSP-5001 controller-actuator.
- CSP-5001 direct couples to damper shaft; has adjustable stroke, LED, and manual clutch.
- REE series relay modules available for reheat, heating/cooling changeover, and other applications.

# ELECTRONIC CEP-4000 Series

## VAV TERMINAL UNIT CONTROL SYSTEM

### System Configurations

#### Pressure Independent

#### BASIC CONTROL LOGIC

1. In response to space temperature, the room thermostat sends a 3 to 6 vdc "desired air flow" signal to the CEP-4000 series controller-actuator.
2. The controller-actuator compares this "desired air flow" signal to "actual air flow" as derived electronically using input from the SSE series duct sensor.
3. The controller-actuator drives the VAV damper box open or closed as required to match airflow requirements.

For individual component specifications, see following pages in this section.

- Cooling or heating airflow sensed by temperature compensated hot-wire anemometer sensor.
- Velocity sensing unaffected by changes in duct air temperature.
- Air velocity minimum and maximum flow limits set at the room thermostat.
- CEP-4000 series controller-actuator direct couples to damper shaft on VAV terminal unit.
- REE series relay modules available for reheat, heating/cooling changeover, and other applications.

## Flow and Liquid Level Switches

### FS-2 Water Flow Switch

Adjustable to Fit 1" to 8" Pipe Size  
for Flow Setpoints of 1.8 to 196 GPM

Weatherproof NEMA 4 enclosure; suitable for outdoor installation.

Leak proof snap-acting magnetic switch operation.

Paddle with 4 selectable lengths for large flow setpoint adjustments;  
internal screw for finer setpoint adjustments.

Ideal for "flow or no flow" in cold and hot water applications.

Operating Temperature:  $230^{\circ}\text{F}$  ( $110^{\circ}\text{C}$ ) maximum.

Operating Pressure: 145 psig (1000 kPa) maximum.

## Electric Actuators

### MEP-4000 Series Actuators 40 in-lb, Non-Spring Return

UL Listed USA and Canada

*Small footprint 2.6" x 5.3"*

*90 seconds run time for 90°*

*Mount to 1/4" to 5/8" round, 1/4" to 7/16" square shaft*

*Removable 1/2" conduit fitting (except MEP-4003)*

*-22 to 131° F (-30 to 55° C) operating ambient*

## CSC-1001

### Constant Volume / High Limit Controller

*Two output connections allow CSC-1001 to be used as either:*

- constant volume controller without thermostat override
- high limit controller which assumes control of the VAV terminal if the thermostat calls for excessive airflow

20 psig (138 kPa) operating, 30 psig (207 kPa) maximum pressure.

### MCP-3631 Series Rotary Damper Actuators for VAV Terminal Units

*Mount direct to 1/2" damper shaft with bushing & collar,  
or to cross-hole in shaft with pin & retaining clip  
(all mounting hardware ordered separately)*

*Optional adaptor available for mounting to 3/8" shaft.*

*Damper can be driven from either side of actuator, allowing use on normally open or  
normally closed dampers with clockwise or counterclockwise rotation on loss of control air.*

*0-20 psig control signal input. 30 psig maximum pressure.*

## Gradual & Selector Switches

### Panel or Surface Mount

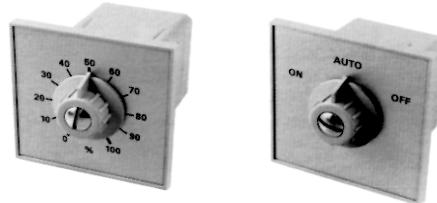

Supplied with blank faceplate. Order HDO series scaleplate separately.

Flush mount on panel face in 2" (51mm) diameter cutoff.

Surface mount with optional HMO-4506 mounting bracket.

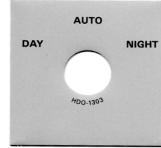

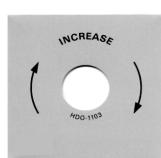

Nipples for 1/4" OD (6mm) polyethylene tubing.

30 psig (207 kPa) maximum supply pressure.

## Pneumatic Thermostats

### Pneumatic Thermostat Packages

Two-Pipe, Direct and Reverse Acting

**Package Includes Thermostat Module, Vertical °F Scaleplate, Almond Window Cover and Backplate to Mount to 2"x4" Electrical Box**

*Backplate adapts to most Barber-Colman, Johnson Controls, Landis & Staefa, Robertshaw & Siebe thermostat mounting plates*

*20 psig Operating, 30 psig Maximum Main Air Pressure*

*Factory Calibrated to 9 psig Branch Pressure*

## Pressure Regulators

In-Line, Panel or Surface Mount

*Relieving diaphragm type regulator for use only with compressed air.*

*Non-rising push-to-lock adjustment knob maintains setpoint.*

*Two full flow gauge ports. Either usable as additional regulated output.*

*In-line mounting or surface mounting bracket available. Not position sensitive.*

*Maximum pressure 300 psig (2068 kPa).*

*0° to 150° F (-20° to 66° C) ambient with air sufficiently dry to avoid ice formation below 35° F (2° C).*

## Filter-Regulators

In-Line, Panel or Surface Mount

*5 micron filter element removes most solid and liquid particles.*

*Relieving diaphragm type regulator for use only with compressed air.*

*Non-rising push-to-lock adjustment knob maintains setpoint.*

*Automatic drain models with 1/8" MPT drain connection operate unattended.*

*Standard series units have metal bowl and liquid level indicator.*

*Maximum pressure 150 psig (1034 kPa) for miniature series; 250 psig (1724 kPa) for standard series.*

*0° to 125° F (-20° to 52° C) ambient for miniature series; 0° to 175° F (-20° to 80° C) with air sufficiently dry to avoid ice formation below 35° F (2° C).*
